Industrial Fabrication & Supplies

Fiberglass & Lumber Fabrication & Supply for Engineers & Contractors

Our fabrication plants in Northern California and the Gulf Coast are positioned to serve our customers quickly and efficiently. We have a long standing reputation for delivering high quality fabrication and materials in a timely and cost-effective manner.

- **Industrial Machinery**
- **Done Correctly**
- **Stocked Inventory**
- **Fast On-Time Delivery**
- **Experienced Fabricators**
- **On-Budget**

Our customers benefit with significant labor cost savings and improved safety when fabrication and assembly are done at our shops.

Custom Structural Fabrication

A tank stand was fabricated with EXTREN® structural shapes, SAFRAIL™ handrail system and DURADEK® pultruded fiberglass grating for an industrial plant.

Strongwell's pultruded grating replaced rusted grating in a catwalk system for a California winery.

The Avila Beach Pier in California was reconstructed using EXTREN structural shapes for support, DURADEK® pultruded grating, stair treads and custom handrail.

SAFDECK is lightweight and easy to install, especially in rooftop applications like this cooling tower fan deck. The quick screw-down construction of the SAFDECK system ensures rapid installation and reduced field labor costs.

EXTREN 
Structural Shapes & Plate

- Corrosion Resistant
- Low in Conductivity - Thermally & Electrically
- Nonmagnetic - Electromagnetic Transparency
- Lightweight - Weighs 80% less than Steel
- High Strength
- Dimensional Stability
- Low Maintenance
- Custom Colors

Water / Wastewater Products - Baffles, Covers, Walkway Structures

Corrosion of metal structures in water/wastewater treatment plants is severe and requires constant maintenance, downtime and replacement. Low maintenance fiberglass structures are ideal for this environment because they are lightweight, corrosion resistant and easy to install.

Above: Lightweight corrosion resistant 24" fiberglass I-beams span 45' to bridge clarifiers at a wastewater treatment plant in Las Rusias, Texas.

Left: A baffle system using Strongwell's baffle panels and EXTREN® structural shapes was fabricated for this chlorine contact chamber. FRP was chosen for its low cost and high corrosion resistance. Even after more than 5 years, the FRP panel system is still exceeding expectations (see inset).

Above: FRP odor control covers around the perimeter of wastewater treatment tanks in Grand Prairie, Texas, were fabricated using COMPOSOLITE® and DURASHIELD® structural panels, EXTREN® and several custom shapes.

Above: Low maintenance fiberglass grating, ladders and handrail replaced steel to provide trouble-free operations for a wastewater treatment clarifier in Albert Lea, Minnesota.

More than 100,000 square feet of re-manufacturing and fabrication facilities on 10 acres in Northern California and Texas.

Cooling Tower Resources is a WCLIB (West Coast Lumber Inspection Bureau) licensed grading agency. Our stamps and our certifications assure both you and your customers that they are getting what they paid for.
